OLEKSANDR CHEKRENOV

FRONT-END DEVELOPER

SUMMARY

I am a Junior Front-end Developer with strong skills in HTML, CSS, JavaScript, React, and Vue (on basic level). I am experienced in building responsive cross-browser web interfaces, paying attention to details and code quality with continuous self-technical improvement. I also have practical experience of working in a team.

PROJECTS

1) Photo Studio - [GitHub](#)

Pet project: website for a photography school with general information about it; the project includes responsive design.

Tech stack: HTML, CSS, JavaScript, Adaptive web design, FlexBox, Vite

2) Portfolio (Header/Hero) - [GitHub](#)

Team project: a portfolio website for a developer.

Tech stack: HTML, CSS, JavaScript, Adaptive web design, FlexBox, Vite

3) Phone book - [GitHub](#)

Pet project: a small phone book for creating, deleting, and adding contacts, with separate user registration.

Tech stack: HTML, CSS, JavaScript, ReactJS, Vite, Vercel, Axios, Formik, React, Redux

4) Weather App - [GitHub](#)

Pet project: a small app to check the weather in your city.

Tech stack: HTML, CSS, JavaScript, VueJS, Vite

5) Web Studio - [GitHub](#)

Pet project: web studio site, that can be used as a template for other similar projects to speed up the development time.

Tech stack: HTML5, CSS3, JavaScript, Adaptive web design, FlexBox

6) Web Service - [GitHub](#)

Pet project: contact database for user creation and contact management.

Tech stack: NodeJS, JavaScript, MongoDB, Postman, RestAPI, Express, Swagger, Libraries

7) My Portfolio - [GitHub](#)

WORK EXPERIENCE

MegaBud

System Administrator

2022 - PRESENT

System administration and support of the organization, including web development responsibilities (maintaining and updating of corporate websites).

Achievements:

- The internal network has been reconstructed in all offices, with their unification into a common network. Each office was assigned dynamic IP addresses that could change depending on the needs of the network. MikroTik and Ubiquiti solutions with appropriate settings were used to replace outdated equipment.
- Performed a complete migration of information from physical server to cloud storage using Hetzner. Regular backups were configured in the cloud storage.
- To ensure secure remote access, the VPN infrastructure was reconfigured to a new solution - WireGuard.
